

Our team has two members: Mengjie Shen, Tianyu Zhang. We use Flask for back-end, Html and Java-script for front-end. Mengjie Shen mainly works on the back-end part and Tianyu Zhang works on the front-end part. In order to finish the report in time, we plan to work on the project every night next week. Currently, we have some trouble in drawing bar chart and we are actively finding solution to solve it. We have already implemented View Public Info, Register and Login page so far. we used the file provided by professors to create tables. Currently, we don't have plan to use additional attributes. We inserted data provided by professor and we also create some by ourselves through the process of testing our functions.
